****Modified Parts.** - During busy periods we require any parts for modification at least 2 weeks prior to the collection of your kit to allow for the work to be completed. If parts are left for alteration at the time you collect your kit we will complete the work as soon as possible. If you then require them delivering back by our parcel carrier service, an extra charge will be incurred. Alternatively, we can from time to time supply second hand modified parts at a surcharge, please enquire.

Notes:

Save all nuts & bolts as they may come in useful/save money at a later stage
If available keep the V5 (Log Book), Vin Plate & Chassis Stamp (to aid SVA registration)

See also our parts list, which we are constantly adding to. Our aim is to be able to supply all the remaining parts required to complete an MK Indy to SVA requirements. (Including many new Ford replacement parts).
